

FUNSTON RETURNS.

Still Suffers from Appendicitis.

Favors Keeping Troops in His Old Province.

He Hastens to Oakland to See His New Baby.

Gen. Robert P. Hughes Says Trouble Exists in Samar.

SAN FRANCISCO, Jan. 9.—(Exclusive Dispatch.)—After an absence of over thirteen months, Brig-Gen. Funston returned today on the transport Warren on two months' sick leave, which may be extended, as he is still suffering from appendicitis, which kept him in the hospital in Manila over three months. Another operation for the disease will be necessary. Gen. Funston was more interested in his baby than in telling of his exploits in the Philippines. His son and heir was born only three weeks ago, after he had been given full leave from his duties. He is now in the hospital, and the Gen. is expected to return to his duties in the Philippines.

Gen. Robert P. Hughes was also on the Warren. He has been in the Philippines longer than any of the general officers of the army. He sailed with Gen. Merritt nearly four years ago, and has been on constant duty ever since. Immediately after the capture of Manila he was made Provost Marshal of the city, and in this position he displayed remarkable executive ability. In a few months he changed Manila from one of the dirtiest cities in the Orient to the cleanest. For two years he has been in command in the central islands, or Visayan group.

He said, in speaking of the conditions there: "Everything has been quiet in Cebu, Panay and Negros for many months, but in Samar we have our work cut out." The people are hostile and the country is such that it is difficult to operate in, but if the American soldier be given full leave, he will settle the matter in time.

Gen. Hughes has probably seen his last active service, as he will retire next year.

SERGT. SYLVESTER BURKE, Sergt. Sylvester Burke of the Ninth Infantry was one of the passengers from Manila on the transport Killpatrick. He is of Co. C, that was almost annihilated by natives of Samar in 1905. He is now a private, and his services at the time his company was surprised. Burke, in talking of the massacre, said:

"My district was perhaps the most densely populated of any in the islands, and was an exceedingly rich and productive country. But a small portion of it had been cultivated since 1896, but when the season for planting opened in the spring of last year, the natives held as prisoners by us had

TROUBLES A-PLENTY.

Zelaya Plotting a New Coalition.

Central American Union Against Colombia.

Paraguay's President Overthrown by a Revolution.

American Creditors of Venezuela Urge That Germany's Course Be Adopted.

OLON (Colombia) Jan. 9.—(By South American Cable.) Gen. Al-ber, the commander of the Colombian forces, has received information that President Zelaya of Nicaragua has invited the other four Presidents of Central America to attend a conference at Corinto, Nicaragua, with the object of inducing them to enter into a coalition against Colombia.

URIBE-URIBE (By THE NEW ASSOCIATED PRESS—P.M.) COLON, Jan. 9.—It is reported that the Colombian revolutionary leader, Gen. Uribe-Uribe, has entered the department of Santander with a large force of men.

A moderate norther has been blowing here since yesterday.

NICARAGUA'S PREPARATIONS. GERMAN PAPER'S SENSATION. (By THE NEW ASSOCIATED PRESS—P.M.) BERLIN, Jan. 9.—(By Atlantic Cable.) The Kleines Journal, which sometimes prints exclusive news, publishes the following dispatch today from Hamburg:

"Nicaragua is making extensive war preparations. She has purchased the German warship Arcturion; is negotiating for the purchase of two other warships; and has bought cannon, rifle and ammunition amounting to the value of 1,500,000 marks, through the Nicaraguan Minister at Berlin, Señor Rocha. A certain Hamburg bank loaned the money for the purchase.

"The object of these preparations is that Nicaragua, Honduras and Salvador intend to attack Guatemala and Costa Rica and compel them to join the proposed Central American union. Señor Rocha is reported to have tried to induce the Prussian War Minister to supply Nicaragua with arms, which the ministry refused to do.

Inquiries made here fail to confirm the statements contained in the dispatch of the Kleines Journal.

VENEZUELA'S TROUBLES. AMERICAN CREDITORS EAGER. (By DIRECT WIRE TO THE TIMES.) WASHINGTON, Jan. 9.—(Exclusive Dispatch.) Venezuela, beset by internal dissensions, and daily expecting foreign complications through Germany's purpose to make her pay obligations to German subjects, is in danger of new troubles which must tend to subvert even the bold and defiant spirit of President Castro. Germany's announcement of her intention to make Venezuela pay up has had the effect of bringing other creditors to the point of importing their governments to follow the example of the Kaiser. There

are a host of people in France and the United States who had vainly endeavored to secure a settlement of their pecuniary claims against the Venezuelan government, and these have now begun to renew their efforts to bring Castro to terms.

Since the publication of the statements of Germany's plans to compel Castro to satisfy his German creditors, many Americans who have had unfortunate experiences in dealings with Venezuela have written to the President and State Department urging that the example of Germany be followed. However, the United States will not move until Germany has carried out her plans for bringing Castro to terms. Meanwhile, American claims will probably be brought to the attention of the Venezuelan government through ordinary diplomatic channels.

FRENCH CLAIMS. COERCIVE MEASURES URGED. (By THE NEW ASSOCIATED PRESS—A.M.) PARIS, Jan. 9.—(By Atlantic Cable.) Frenchmen having claims against Venezuela are urging the government to adopt coercive measures. The government, however, is undecided whether to do so or not. Nevertheless, in view of the possibility of such action, it has informally sounded Washington on the feeling of the United States in the matter.

CEVAL OVERTHROWN BY A REVOLUTION. PARAGUAY'S PRESIDENT AND EX-PRESIDENT ARRESTED. Revolt Headed by the Ministers of War and Finance, Who Will Issue a Manifesto Explaining Their Actions, at Present Unexplained.

(By DIRECT WIRE TO THE TIMES.) BUENOS AIRES, Jan. 9.—(Exclusive Dispatch.) Dispatches from Asuncion announce that President Emilio Aceval of Paraguay has been overthrown by a revolution. The revolt was headed by the Minister of War, Col. Escarria, and the Minister of Finance, Señor Moreno. President Aceval and Gen. Eguiguren, formerly President of Paraguay, were arrested this morning at their residences. They offered no resistance, and were placed in prison. The leaders of the revolution will publish a manifesto to explain their action. As the revolt has the support of the army, there is no probability that President Aceval will return to power.

SEÑOR ACEVAL became President of Paraguay November 25, 1928. He succeeded Gen. Brusquillas, under whom he had been Minister of War and Navy. He is one of the most scholarly men in South America and enjoys a splendid reputation as an orator.

GOT THE WRONG MAN. An Acid-thrower at Aurora, Ill., Makes a Serious Mistake—No Clue to the Mischance.

(By THE NEW ASSOCIATED PRESS—A.M.) AURORA, Ill., Jan. 9.—Charles Strausberger of Chicago, a student of the priesthood, was the mistaken victim of an acid thrower at the Burlington depot here last evening. As Strausberger entered the door of the depot a man stepped in front of him and dashed a vial of acid in his face. The fluid missed his eyes, but the right cheek and nose were badly burned. The thrower took a second look at his victim and cried out: "Oh, God, I've got the wrong man!" and fled. There is no clue to the identity of the thrower.

AT NEW YORK HOTELS. NEW YORK, Jan. 9.—(Exclusive Dispatch.) E. L. Hine is at the Astor; J. Jay and A. Tate are at the Imperial; C. MacCall is at the Morton; O. C. Thompson of San Diego is at the St. Denis.

WASHINGTON (D. C.) Jan. 9.—[Exclusive Dispatch.] City Treasurer Workman of Los Angeles, who is spending a few days in Washington, says that the report that there will be a hitch in negotiations for selling the Los Angeles city water bonds in New York is all wrong.

Mr. Workman says he has practically completed his negotiations for the sale of the bonds, and that the New York banking houses taking them will pay for them as soon as the money market eases up a little. The Los Angeles Times has all along contended that these bonds are good and will sell.

There always is a money pinch in New York just before and just after the first of the year, due to the large demands made upon banks and bankers for cash to pay interest and dividends, and it always is a bad time for selling bonds or stocks that will take money immediately and directly from New York.

Workman says, however, that it is apt to be some time before he can get things finally straightened out so that he will be at liberty to return to Los Angeles.

HEPBURN WINS OUT.

Canal Bill Passed by Big Vote.

He Has a Clash With Chairman Cannon.

Present Appropriation of Ten Million Dollars Asked.

San Diego Customs Fight—Mission Tule Indian Agency.

WASHINGTON, Jan. 9.—The Hepburn Nicaragua Canal Bill passed the House late this afternoon by practically a unanimous vote. Only two members out of 210 voted against it. Messrs. Fletcher, Republican, Louisiana, and Democrat, of Virginia were the only two casting negative votes.

The opposition to committing the government to the Nicaragua route attempted to secure amendments to lodge with the President the discretionary power to purchase and complete the Panama Canal, if it could be purchased for \$40,000,000. The test came on the first vote, when the advocates of an alternative route polled 162 against 178 votes. At such a narrow vote, their strength divided until Mr. Cannon of Illinois, under whose leadership the fight was made, was unable to get the yeas and nays on a motion to reconsider. All other amendments failed, and the bill was passed exactly as it came from the committee. None of the votes, except that on the final passage of the bill, was a record vote.

The debate which preceded the taking of the final vote was made memorable by a clash between Mr. Hepburn, the author of the bill, and Mr. Cannon, chairman of the Appropriations Committee. On several previous occasions, they have measured swords over canal legislation. Two years ago a similar bill was passed by a vote of 224 to 23.

The bill as passed today authorizes the President to secure from the States of Costa Rica and Nicaragua, in behalf of the United States, control of such a portion of territory belonging to said States as may be desirable and necessary, on which to excavate, construct and prospect a canal suitable for the wants of modern navigation and commerce, and expend such a sum as may be necessary to secure the control of the said territory.

Section two authorizes the President after securing control of the needed territory, to direct the Secretary of War to construct such a canal from the Caribbean Sea at a point near Greytown, in Nicaragua, by way of Lake Nicaragua, to a point on the Pacific Ocean near Brito, and also to construct proper harbors at the terminus of said canal, and to make necessary provisions for the defense of the canal and harbors.

Sections three and four authorize the President to make such surveys as may be necessary and to employ such persons in constructing the canal as may be deemed wise, and directs that in the construction of the canal the River San Juan and Lake Nicaragua shall be used as far as they are available.

Section five authorizes the President to guarantee to the States of Costa Rica and Nicaragua the use of the canal and harbors upon terms to be agreed upon, for vessels owned by citizens thereof.

The last section makes a present appropriation of \$10,000,000 to carry on this work, and authorizes the Secretary of War to enter into proper contracts for material and work as may be deemed necessary thereof, such work and material to be paid for as appropriations may be made from time to time. This section fixes the aggregate cost at \$180,000,000, to be drawn from the treasury on warrants of the President.

PANAMA COMBINATION. (By THE NEW ASSOCIATED PRESS—P.M.) WASHINGTON, Jan. 9.—The Committee on Inter-oceanic Canals today authorized Senator Morgan, as chairman of that committee, to appoint two sub-committees of five members each to make inquiry concerning alleged combinations between the railroads to control charges on the Isthmus of Panama. Senator Morgan expressed the opinion that it will be necessary for a sub-committee to visit New York, and as he felt that the expedition was necessary, he asked for a committee for that purpose, as well as one to sit in this city. The sub-committees have not yet been named.

MISSION TULE AGENCY. FIGHT AGAINST DR. WRIGHT. (By DIRECT WIRE TO THE TIMES.) WASHINGTON, Jan. 9.—(Exclusive Dispatch.) The old fight, which has been made every year for the last three or four years, against making an appropriation for the maintenance of the Mission Tule Indian Agency at San Jacinto, has appeared again this winter, and Commissioner of Indian Affairs Jones said today that Congress would be requested by the Indian Office to make no appropriation for the agency. The fight is not against the agency particularly, but against Dr. Wright, who is the agent there. It is being conducted by a little band of men at Riverside, Cal., who are seeking

PRACTICALLY SOLD, ARE WATER BONDS.

WASHINGTON (D. C.) Jan. 9.—[Exclusive Dispatch.] City Treasurer Workman of Los Angeles, who is spending a few days in Washington, says that the report that there will be a hitch in negotiations for selling the Los Angeles city water bonds in New York is all wrong.

Mr. Workman says he has practically completed his negotiations for the sale of the bonds, and that the New York banking houses taking them will pay for them as soon as the money market eases up a little. The Los Angeles Times has all along contended that these bonds are good and will sell.

There always is a money pinch in New York just before and just after the first of the year, due to the large demands made upon banks and bankers for cash to pay interest and dividends, and it always is a bad time for selling bonds or stocks that will take money immediately and directly from New York.

Workman says, however, that it is apt to be some time before he can get things finally straightened out so that he will be at liberty to return to Los Angeles.

TSI AN STILL HOLDS REINS.

Emperor Kwang Hsu is
Mere Figurehead.

Empress Dowager Does
All the Talking.

Old Lady is Very Nervous, but
Polite to Foreigners—Gen.
Siang Doomed.

THE NEW ASSOCIATED PRESS—(By Atlantic Cable.) The Dowager Empress of China asserted her complete supremacy today by granting an audience in the most sacred hall in the Forbidden City. The rules of the dynasty forbid women from entering this hall, and the Dowager Empress has never before violated its sanctity.

The Empress will receive the foreign diplomats in this hall. Officials believe the Dowager Empress is preparing the way to be present upon this occasion in order to prevent any communications between the diplomats and the Emperor, except under her censorship.

The Dowager Empress is preparing to send letters to the ministers of the foreign powers here expressing her desire for the maintenance of the friendly relations and her willingness to receive advice in audience.

Progressive Chinese officials say that the Dowager Empress disapproved of the Emperor's wish in this matter were overruled, and that her edicts were carried out.

It is possible that Gen. Tung Fuh Siang, the notorious anti-foreigner, whose deputation has been ordered by the Dowager Empress in an edict, has already been beheaded.

The Dowager Empress is preparing to send letters to the ministers of the foreign powers here expressing her desire for the maintenance of the friendly relations and her willingness to receive advice in audience.

Under her thumb, the Emperor has no say. The Dowager Empress is preparing to send letters to the ministers of the foreign powers here expressing her desire for the maintenance of the friendly relations and her willingness to receive advice in audience.

Company will take up the work of construction, continuing the road from Hankow or more properly speaking, from Wu Chang, on the southern bank of the Yang-Tze, southward to Canton. Connecting with the line under construction by the Belgian syndicate and, apparently having a friendly understanding with the projectors of that enterprise, the American line will furnish the southern section of a great trunk road, extending from the capital to Canton, the great port on the China Sea. At Peking connection will be made with the Chinese Imperial Railway, where the northern arm joins with the Manchurian branch of the Trans-Siberian road in the neighborhood of Xuyi-Kwang.

been liberated. The Chief returned with the natives, all bearing holes, but instead of beginning to work, they fell on the Americans. Some of us were with Capt. Connell in quarters, and others were in the church. The natives descended upon us about 200 strong, and chopped our men down without mercy.

"Capt. Connell jumped out of a window, a distance of about fifteen feet, to the ground, but was overtaken and hacked to pieces. I followed him, but was overlooked by the bloodthirsty natives, for they passed me on the way to the second story of the church. I followed them, and coming suddenly upon two, I threw one out of the window and scared the other into flight.

"Fortunately I found a revolver, and with it I killed the Chief of Police and three others. The shots put the natives to flight, and they took to the brush, but not before forty-eight of the seventy-one men of Co. C had been either killed or taken captive. Thirteen of the remaining twenty-three men had been wounded.

"Soon after the rout of the natives we started for Baguio, thirty miles away, where Co. G of the Ninth was encamped. Fifty men of that company went back to Baguio and buried our dead. The remaining twenty-three men of Co. C are now at Calbayog, Samar."

REPORT BY REV. HAZLETT.
(BY THE NEW ASSOCIATED PRESS—A.M.) SAN FRANCISCO, Jan. 9.—Rev. A. L. Hazlett, a Methodist Episcopal minister of Colorado City, Colo., returned today from the Philippines. He went to the islands at the request of Gen. MacArthur and under the authority of the Secretary of War, to study and report upon the moral conditions in the islands, particularly in Manila.

Since the American occupation of the Philippines, the moral conditions of the city have been better than in the past. The arrests for drunkenness have rapidly decreased in number, and for the good reason that drunkenness has been discouraged by the authorities in the right manner.

"It was formerly said that there were 400 saloons in the Escorial, but now not one is to be found there. The total number of saloons in the city is 109, and they are governed in a strict manner. The city generally is in pretty good condition, and its management reflects credit upon the Americans who have its government in charge."

MANILA is the best-governed city I have ever seen," said Rev. Hazlett today. "I do not believe its equal in this respect exists in the United States today. The moral condition of the city is better than before the American occupation. The arrests for drunkenness have rapidly decreased in number, and for the good reason that drunkenness has been discouraged by the authorities in the right manner."

San Diego County Grand Jury Scored.
SUPERVISOR FILES WARM REPLY TO ITS REPORT.

Aged National City Widower Who Deeded Valuable Property to Woman Wants It Back—Held on Charge of Cattle Stealing.

SAN DIEGO, Jan. 9.—(From The Times Herald Correspondent.) The report of the late grand jury which recommended the abolition of the office of fish and game warden, inspector of fisheries, and the Horticultural Commission, and which went into the hobo question at length, scoring the justices and constables for malfeasance of office, and finding criticism for the Board of Supervisors for conducting affairs with such a loose rein, has as yet received no official recognition from the county legislature.

San Diego Brevities.
A resturvey of the crest of the outer harbor has been ordered, and three representatives of the Coast and Geodetic Survey have arrived to carry out the orders. The reason for the order is found in the fact that the light-house, which is a landmark, is being encroached upon by the harbor.

San Diego Brevities.

FRIDAY, JANUARY 10, 1922.

FULL OF OIL ALL THE DAY.

Mayors and Councilmen on Good Roads.

White of Chino Tells 'Em Everything.

City Charters the Burden of the Night Discussion—Last Day.

There was nothing in the second day's show of the League of California Municipalities but oil. Supervisor Theodore F. White of Chino was the star, and he played the one-day stand of his life.

In the morning the city government experts gave an hour to the sewage question, and in the evening they listened to lengthy papers on charters, comfort to travelers. The oil emits no odor twenty-four hours after application because of evaporation. The oil is heated to make it easier to handle.

The best results have been achieved from Los Angeles crude oil of 12 or 13 gravity with only 2 or 3 per cent. water, as well as from a Puente residuum of 14 or 15 gravity. Oil cost last year in San Bernardino \$1.12, and on that basis in one district twelve and one-half miles were treated, six miles having been oiled before. There were 1800 barrels of oil used. As much as 200 barrels were used for a mile of road certain sections costing about \$100 a mile for everything.

C. A. Giffen, who has supervised oiling of streets in Los Angeles for the street superintendent, explained in detail the methods used, stating that he had never applied sand or used a rake. He considered the idea successful.

Albert K. Smiley of Redlands said he considered oiling roads a wonderful invention and ventured the prediction that it would be in vogue throughout California. Iverson of Redlands also endorsed the system.

ROYALTY CHALLENGED.
The question of the legality of the royalty charged for the use of the idea was raised by Mr. White, and he was backed up by Mayor F. E. of Santa Ana. It was stated that in several instances public bodies had refused to pay the tax, and several delegates expressed doubt as to whether it could be collected in the courts.

W. Matson, head of the California Distillers Road Company, hatcher of the idea, was given five minutes to defend himself. He has been granted a regular patent on his "dustless road," which he sold to a New Jersey syndicate.

ment: Carl R. Briggs, Redding; E. E. Bolton, Hollister; W. L. Peters, Riverside; R. J. Boyer, Oakland.
Judiciary—C. Kirkland, San Mateo; George C. Loucks, Pomona; W. F. Heathman, Santa Ana; H. T. Partridge, San Jose; Raleigh Barcar, Vacaville; Engineering—H. F. Stafford, Los Angeles; M. L. Lum, Redlands; H. Henderson, Merced; J. L. Meyer, Santa Barbara; T. D. Allen, Pasadena.

TO VISIT SANTA MONICA.
Mayor Robert F. Jones of Santa Monica extended an invitation to the delegates to visit Santa Monica Saturday morning as guests of the Los Angeles Pacific Railway Company. The convention adjourns Friday night, and quite a number were compelled to leave last night because of urgent official duties. At the call of the chair only a few expressed their ability to accept the invitation, and the excursion was considered off.

At the afternoon session, however, the matter was again brought up, and Mayor Snyder by his eloquence made the delegates forget affairs of state waiting at home. The Mayor talked of the sunshine, the birds, bees and flowers, and converted twelve delegates, enough to make the trip a certainty.

A proposition to make each delegate pledge up \$1.00 for a banquet was killed outright, as all but three or four of the more sportive public servants registered for the first time since the convention opened, among whom were the venerable Smiley brothers of Redlands, who were applauded when called upon to

NOTES BY A NEWCOMER.

Nature helps man in California. In other parts of the country it is a constant struggle with man to compel nature to return the bounty she can give. It is an ordinary thing in the East to find some obscure room in a great city, where a lone, scraggly geranium is being nursed slowly and feebly to the expression in a few withered blossoms of a little red gayety, which once coming stays no longer than the season. In the summer the sweet peas languish for a month or six weeks by dint of water and care, fully-prepared beds, and then pass on for the panes and roses of early summer. The canna and lilies that come later, and finally for the hard geraniums of early fall.

At the most six months sees the extent of the floral array, and what is seen is had only at the expense of care and labor. Here the geranium, whose scanty fragrance means so much to the noxious cultivation of the flower-stem. East, blossoms perennially, and comes with such bountiful luxuriance that geraniums are sometimes regarded as a pest, rather than as a blessing. The helpfulness of nature is seen, too, in the extraordinary growth of alfalfa, which sprouts up five or six times a year, sometimes producing as many as eight crops between January and January. In the great hay states of Wisconsin, Minnesota and the Dakotas two crops a year is the best that can be done, though will grazeable alfalfa times yield three cuttings. Alfalfa is to California what hay is to the East. A California tree is a blessing to a poor man, for, in addition to its medicinal properties, and its pungency, which is not disagreeable, the single grove will furnish him, after a five years' growth, with enough wood from its trimmings for his morning and evening fires. The little rest which nature requires seems, when water and fertilizers are used to be no rest at all.

The natural bounty has its most surprising effect in the doorways of the ordinary homes of Los Angeles. There the extraordinary effect of a tropical foliage in a moderate climate is obtained. The palms that grow everywhere are almost unreal, they are so rich in foliage. Not only do they without them seem as though they lacked something, just as a doorway in a Chicago suburb is barren without its maple or elm shoots. The flowers that climb nearly everywhere are an added color, making every house a separate study in itself, just as though the entire city were a gallery of paintings.

Roses are not only on bushes, but they climb as well, and that is a rare sight to an easterner who comes from a country where a climbing rose is a curiosity. The poinsettia furnishes the brightest color in its brilliant scarlet, though some Mexican and Australian importations are more striking, because not so common.

It is the peculiarity here of climate that makes flowers and foliage from everywhere will grow here. To grow the tropical plants of the south side by side with the trellised smilax of the North and East, and the Japanese bamboo growing in the same yard with a Michigan apple tree, is not uncommon. The fact that oranges, lemons, pineapples flourish with astonishing productivity here, does not prevent the growing of apples, peaches and pears, while the grape is, of course, a staple California product. Peaches, however, do not attain the juiciness that they do in the Middle West, while apples are not so good as those of the West, but they are in Oregon.

BEGGARS GALORE.
Public Continues to Be Duped by One-Legged but Healthy Men Able to Make Honest Living.

The occasional campaigns against street beggars have their temporary effect, but the lazarous soon flock back to their accustomed haunts, and ever few days a new face may be seen among those who daily line the streets and solicit alms from choate shoppers. The public seems to enjoy being fooled, and the lazy "moochers," most of them well able to work, make their way by night, their pockets jingling with silver. The most unfortunate of the beggars, and the least deserving, are the men, each with one leg gone, who insist on the sidewalk on Spring street and Broadway. Each of these fellows sits on his good leg in such a manner as to make it appear that both limbs are gone, thereby exciting the sympathy of tender-hearted women. The police could tell the supporters of these lazy beggars some tales of how the fellows spend their nights in the shelter of a raincoat, and in the shower of silver that rains constantly into the outstretched hats. Quite often the beggars are taken to the Police Station at night charged with drunkenness or disorderly conduct, the result of dissipation with their easily-gotten funds.

One of the one-legged fraternity is a fat, evil-disposed fellow, who sits sometimes on Spring street, and at other times on Broadway, according to the leniency of the officer on the beat. Not long ago he was found at midnight in a Main-street restaurant, gorging himself with the best there was to be had. He had enjoyed a good day's haul, and had spent the evening in having a gay time, in the course of which he had become associated with an old man, who accused the beggar of robbing him of several dollars. The officer to whom the man was reported as lost would not arrest the beggar because the old man would not agree to Jerome said he added, before she parted with him she added quite a lump to his pile of coin, thinking she had done a charitable act.

J. D. Choate of New York City is at a sanitarium at Boulder, Colo. For thirty days he has eaten nothing but fast has been self-imposed, because of stomach trouble which would not yield to medical treatment.

IN TWO PARTS.

Part II—6 Pages.

PRICE 3 CENTS

GAGE GANG FRIGHTENED.

One of Their Boomers "Fesses Up."

Says Machine Will Have Life Struggle.

Senator Flint is Coming South Again in a Few Weeks.

The supporters of Senator Flint for the Governorship now are buckling down to the work which they have cut out, and it will be but a short time before the organization of strong Flint clubs will be commenced throughout the State. Senator Flint is still at his home in the north, but is expected to reach Los Angeles in about three weeks, when he will give fresh impetus to his boom.

The Flint people are much gratified over the outlook for their candidate, and they say they are receiving encouragement every day. They place no importance in the endorsement received by Gov. Gage at the hands of the State Federation of Labor. Senator Flint's supporters are deriving much satisfaction from the perusal of letters written weekly from the Oakland Tribune by G. F. Hutton of San Francisco. Hutton always has found shelter in the Gage camp and his letter is supposed to be strong in favor of the present Governor, but the Flint men say that Hutton sees the handwriting on the wall, therefore he has given utterance to some admissions which coming from the other side, are taken as an indication that the "gang" by no means feels certain of a walkover during the coming campaign.

In his letter of recent date Hutton says the early bird will have an advantage, for the reason that, because of the simultaneous county elections, this will be a season of confusion. "The organization," says Hutton, "next fall is to run a more severe gauntlet than it has had to face in modern political history. For years the reformers have been gradually gathering strength throughout the State. They showed this time and again on many notable occasions, for although they have been routed more often than they have been victorious, the fact that they have succeeded in gathering in a certain percentage of the prize showed that they were establishing a permanent base. "The memorable extra-session struggle at Sacramento, followed by the election of Hard, appeared to have at last put the anti-machine movement entirely upon its feet, and now is to come the test that means so much to those possessing political ambitions. If Flint and his friends capture the State convention next year it will mean placing the party machinery in the hands of those who have so long been in the minority, and the consciousness that the party machine is being reorganized is also priming themselves for the fray. Their leaders know there is far more involved this time than the nomination of the Governor. It is a struggle for existence on the part of those who have been in control of the party machinery for almost a quarter of a century. Nothing will be left undone, therefore, and no stone will be untuned that can possibly aid the fight, and those who are witnessing the preparations are satisfied that it is going to be one of the most memorable in the history of the State.

"One proposition that is being made very plain as the hours roll on is that the State candidate will be forgo to take a position in one or the other of the main contending columns—Gage or Flint. While other possibilities are the head of the ticket are occasionally heard, it is now apparent that the fight will be confined to the two names, and seeking a nomination will be forced to declare where he intends to stand, and dodging the issue will be out of the question, for it will come up vitally upon the composition of the various delegations. It will take a lot of "fine Italian hands" to pull strings in a way that will produce the best results, and before the fight has progressed very far it looks as if a political war will be raging, for it does not seem possible to avoid having old-time enemies and old-time friends pitted against one another."

In a general summary of the situation Hutton says that Dr. Rowell and his friends in Fresno county will be strong for Flint; that he has many supporters in Shasta county; that the wealthy Russe forces in San Francisco will be against the machine and may support Flint, and that Mayor Clark and his victorious following in Sacramento will stand for the San Benito candidate. Los Angeles, too, is conceded by a correspondent to be a debatable ground.

With the information which they have in hand the Flint people take a very optimistic view of the situation, and they are satisfied they will give the machine the light of its life.

VIOLET RAY CURING HIM.
NEW YORK, Jan. 9.—As a last resort, Dr. John E. Richardson of Brooklyn, who has been a sufferer from cancer for many years, and whose life is despaired of, is submitting to a test of the newly-discovered violet-ray treatment. The physician had informed him that his case was hopeless and that he might die at any moment. A violet-ray machine was installed in his house, and every fair day the rays were concentrated and projected down Richardson's throat. After several months of treatment, it is declared that his condition is so much improved that hopes are entertained for his recovery.

THE CONVENTION OF MUNICIPAL SOLONS IN SESSION.

but it was, all very tame compared with the general interest manifested in the building of good roads by the application of crude petroleum. Northern and other outside delegates confessed that the Southerners had rung in a new one on them.

F. W. Matson, who conceived the idea of laying dust with crude petroleum sixteen years ago, and secured a patent on it, was present, but White took the center of the stage and kept it. He is a walking encyclopedia on oil roads, and fairly percolates oil facts and figures. Yesterday he opened the question with a paper that would about fill this page, and then dared the convention to come on and ask him one he didn't know.

The delegates turned loose and handed inquiries up to him ranging all the way from how many miles of roads in the world has been greased to whether the stuff will or will not cure housemaid's knees. But White never flinched. He would stroke his Populistic whiskers, produce the figures from his sleeve and smilingly ask if the inquirer did not also want to know what proportion made a good throat gargle. He was certainly a glutton for work.

At the close of the oil talk a unanimous vote of thanks was given Mr. White for his hard work. The Engineering Committee was directed to request the Councils of Los Angeles, San Jose and way stations to please conduct experiments in oil sprinkling during the ensuing year, and submit comprehensive reports on the results at the next annual meeting.

OIL BEATS WATER.
The consensus of opinion among the delegates who spoke on the subject from practical experience and observation was that oil was far superior to water for sprinkling country roads and the outlying streets of cities. Many maintained that it was also good for macadam or asphalt-paved streets, but opinion was not unanimous on this point.

It was stated by representatives of Redlands, where there are sixteen miles of oiled roads and streets that the system costs one-quarter as much as water-sprinkling and is incalculably better. It makes a firm, dustless road, and the dark color rests the eyes instead of reflecting the piercing rays of the sun.

only retaining the California field. He said the company maintained that it was entitled to recognition and recompense for the introduction of the plan, and would doubtless test the matter in the courts. Twenty-six delegates, however, expressed their opposition without protest, which has been \$15 a mile, but will doubtless soon be reduced. The legal questions involved were referred to the Judiciary Committee for immediate investigation and report.

SEWAGE DISPOSAL.
A general discussion of the "Disposal of Sewage" occupied an hour of the opening of the morning session and elicited widely-divergent views as to the wisdom of using the refuse for irrigation.

Ed. Tedford opened the question with the statement that Santa Ana, with 800 inhabitants, disposed of its sewage satisfactorily by irrigating thirty-five acres of unleased, sandy land on a ten-acre tract of post land. The residue is carried away and used to fertilize orchards. The sewage is distributed over the farm by means of ditches twelve feet apart. There are about five miles of pipe in town and two and a half miles of pipe in the country. There is no odor and there has never been any complaint as to contamination from products.

Mayor Turner stated that Merced had just accepted its new sewer system. The refuse irrigates 180 acres located four miles from town. The land is hard-packed, and a damage suit has been threatened by neighbors in case the sewage farm proves a nuisance. Mayor Turner said the town expects to raise various crops on the land, and Trustee Devine injected the remark that a microbe crop would probably be the first harvested.

City Engineer Stafford of this city said he could not pronounce the local system successful. President Joseph Hutchinson said Palo Alto's system is satisfactory. Purification by septic tanks was then discussed briefly.

SNYDER TO BE PRESIDENT.
That Mayor M. F. Snyder will today be elected president of the league for the ensuing year very much resembles a cinch. Chairman J. V. Hanford read the report of the Nominating Committee, and stated that the modesty of prospective candidates compelled the referring of the naming of the principal officer back to the whole convention. He thought the presidency should come south this time, although Mayors Parker of Santa Cruz, Catia Strickland, Turner of Merced, Frary of San Diego and Snyder of Los Angeles had been mentioned for the honor.

As ex-Mayor F. E. of San Francisco wired his inability to attend any session of the league, the convention took up the discussion of charters last evening. Several very interesting and instructive papers were read, and the discussion was followed by an extemporaneous discussion.

Councilman J. W. McCauley of San Jose discussed "Government by Commissions," advocating a smaller number of such bodies for municipalities and making them elective instead of appointive. He said the average board was too far removed from the public, and said that while of course it had defects, the new charter of San Jose was in many respects a model one.

Mayor Francis F. of San Diego described and recommended "Dual Legislative Bodies," arguing the good results of having a Board of Aldermen and Board of Delegates in his town. He said that while twenty-three might seem a large number, the bodies did not retard legislation and abolished

C. N. Kirkbride of San Mateo read and discussed ably and at great length the results of a discussion of Aldermen and Board of Delegates in his town. He said that while twenty-three might seem a large number, the bodies did not retard legislation and abolished

TUNNEL DISASTER.
Investigation by New York District Attorney Will Be Thorough—All the Injured Reported to Be Doing Well.

NEW YORK, Jan. 9.—Most of those injured in yesterday's New York Central tunnel accident are reported to be resting well today. As the District Attorney has commenced an investigation to determine the cause of and responsibility for the wreck, the railroad officials have indefinitely postponed their investigation and will present all facts in their possession to the county prosecutor. Another investigation will probably be made by President Canfor of the borough of Manhattan.

At the afternoon session, however, the matter was again brought up, and Mayor Snyder by his eloquence made the delegates forget affairs of state waiting at home. The Mayor talked of the sunshine, the birds, bees and flowers, and converted twelve delegates, enough to make the trip a certainty.

A proposition to make each delegate pledge up \$1.00 for a banquet was killed outright, as all but three or four of the more sportive public servants registered for the first time since the convention opened, among whom were the venerable Smiley brothers of Redlands, who were applauded when called upon to

NOTES AFIELD

proof of the above is found in that deciduous trees stricken with "sour" or other maladies that may have impeded the functions of the tree a two years ago, have grown out

Two years ago it was estimated that the Anglo goats in California numbered 50,000, one stockman at San Jose valued this herd, it was estimated, at \$100,000. In the United States, and his roughbred goats took the lead of all competitors at the Chicago Exposition. In 1856 the second importation from Turkey occurred, and, following every year or so some breeder would send a pair for a selected lot until the year 1870, when the Sultan published an edict, prohibiting any further exportation from his dominions. In 1871 it is estimated that 400 animals were imported by the Americans because it was prohibited, and, fortunately,

any part of the sky, nor will it feel any wind. The temperature at the base or how cold it may feel does it ever freeze hard with a low thermometer. The explanation of this is that a low barometer indicates moisture in the air, and the moisture in the air is in a condition favorable or about to become favorable, as it tells in advance of a storm. In like manner, a decreased dew point is not just after a heavy rain when the moisture is wet, for then there is moisture in the atmosphere. For the above reasons, the farmer does not depend on the thermometer for the time when in dry seasons or at a dry time it is as we have been passing through the first half of December. With the above foreknowledge, remarks made immediately before the storm may, unless they may be avoided, and preparations

to be heavily littered with straw, and any left material available, or any left straw from a scatch. The few birds from a morning's work were not far from the house in consequence, but keep in between and vigor than when given range. Free range during parts of the day, and the birds were very profitable, without question. The few both old and young; but of the latter it was the ground in the vegetation dead, and birds were not so profitable to the hungry in place of food as to compel the birds to go for such a living. The writer is not a plan. A more or less, in keeping plan. During

spidly, but there is probably a considerable difference in the stability of high or low different body weight contributors. It is difficult to distinguish the difference in keep-
ing properties when he examines the present samples. He may adopt as a rule that the vasy bodied, flavored goods will last longer than the which appeal more strongly to nose and palate, but it is a serious question that his judgment in this connection is in individual sam-
ples would be at all accurate, although it might be fairly so on the average.—

Weakness CURED Permanently

G. C. JOSEPH, M. D.

Contrary to the popular belief, weakness is not a disease, but a condition. It is a condition of the system, and it is a condition that can be cured. The cure is not a matter of time, but a matter of method. The method is the one that is used by the doctor who has cured thousands of cases. The method is the one that is used by the doctor who has cured thousands of cases. The method is the one that is used by the doctor who has cured thousands of cases.

**TYRANNICAL HAND
OF SAILORS' UNION.**
EMPLOYMENT OF DICTATORIAL
METHODS IN SAN PEDRO.
Relics of Missing Schooner Bell Found
on Shore of Anacapa Island and Craft
Given Up as Lost—Railroad Under
Suspicion.

SAN PEDRO, Jan. 9.—[From The Times Correspondent.] The tyrannical hand of the Sallors' Union is again in evidence in San Pedro, in an effort to enforce the principle that no vessels of commerce are to be permitted to go out to sea without the consent of the union. The barkentine Skagot, Capt. Robinson, arrived in San Pedro from the north with a cargo of lumber about two weeks ago. Just before she left port her donkey boiler blew up, and the sailor who was running the engine was severely scalded. The skipper asked the men of the vessel's crew to carry the injured man to a train, which was to take him to Los Angeles for treatment in the Marine Hospital there. In spite of the suffering man's assertion that he was a union sailor, his mates refused to carry him because they said he was a "scab."

The Skagot was discharged and is now ready for her return voyage. This morning the captain made application to the San Pedro agent of the Sallors' Union for a man to fill the place of the one who is in the hospital. The union agent refused to furnish a man as requested and gave as a reason that the Skagot had a "scab" crew. The men of the Skagot's crew were shipped at Port Ludlow. They came from Seattle, but were shipped through a man who is not an agent of the Sallors' Union. That is understood to be the reason why the union agent here would not furnish the man called for. According to the union view of it the Skagot's sailors, even though they belong to the union, are "scabs" because they didn't ship through the union agent at Seattle. There are said to be three hundred idle sailors in this city, and the men of the Skagot's crew were very glad to get the work, but that is no excuse for not shipping through a union agent.

Perfect, Positive, Permanent Cures—Men Only.

A man is naturally suspicious of those physicians who make bold to promise impossible cures. The thoughtful physician, realizing the complexity of men's diseases, is most guarded in his promises. Looking backward and at the present, we find that the physician who promises a cure, is almost invariably the one who is most likely to fail. We make no promises. Since a generation ago Dr. Meyer & Co. have been looked upon as the authority and only legitimate specialists for men. Their cures are real. They cure positively. They use wholesome methods. They treat men for private diseases than all other physicians combined, and these men recommend their friends. We believe facts are more potent than promises. All ailments are treated. Consultation free in person or by mail.
